

Karl Bachl GmbH & Co. KG
Gap Analysis of an ISMS according to ISO 27001

Our Cooperation with Karl Bachl GmbH & Co. KG

KARL BACHL GmbH & Co KG is a medium-sized company for products and services in the construction sector. Since its foundation in 1926 in Deching in Lower Bavaria, the range of products and services related to the construction sector has been continuously expanded.

The customer is now represented at over 40 locations with approx. 1,800 employees. In addition to the German production sites, there are also plants and trading subsidiaries in Austria, the Czech Republic, Hungary, Italy, Poland, Croatia and Romania.

Industry:
Building Sector

Service:
Information Security

Services:
IT Security Governance

Methodology:
ISO/IEC 27001

The Challenge

The continuous growth through company takeovers presents the client with the challenge of integrating them into the existing group of companies.

Information security and **data protection** requirements play a central role in this process.

Our task was to determine the **level of information security** according to ISO 27001.

- simple
- intuitive
- consistent

Our Contribution at a Glance:

- KickOff for all stakeholders
- Sensitisation of the interview partners
- Conducting a 2-day gap analysis (incl. on-site visit)
- Preparation of a report on the results
- Transparent presentation of the weak points incl. presentation for the management board

”

What we particularly liked about the cooperation with think tank was the open and honest communication regarding the weaknesses that were uncovered in combination with proposed practical solutions, which were underpinned by the excellent expertise of the consultants.

Hans Maier
Leiter IT

- fast
- precise
- solution oriented

Customer Benefits:

Documented transparency
as a basis for a downstream
risk analysis

Specific recommendation for
actions

Knowledge transfer & sensitisa-
tion of all stakeholders involved
