

IDS GmbH - Analysis and Reporting Services

WARP - Change Order Platform

Our Cooperaton with IDS GmbH

IDS GmbH - Analysis and Reporting Services (IDS) is a 100% subsidiary of Allianz SE. It stands for managed services around data management, risk controlling, performance analysis and reporting of investments and in this context provides its clients with regulatory documents for their portfolio.

What is special about IDS is the holistic coverage of business processes along the aforementioned investment value chain. Through their technical as well as professional solution competence, IDS employees ensure rapid successes, while IDS clients concentrate on their core business and gain competitive advantages.

The task of think tank was to develop a web-based, audit-proof order platform for change orders with specific (e.g. release) workflows regarding regulatory documents and master data (MVP).

Industry:
Finance

Service:
Software Design
Transformation Management

Services:
Digital Business Transformation
Agiles Rollenleasing

Technologies:
InVision, Java8, ExtJS, API, Jira,
Bitbucket, Confluence

The Challenges

The challenge was to create an application that had to be integrated into the **complex infrastructure** within a **short timeframe**.

Due to the client's wish to introduce the **agile approach** at the same time, we also took on the role of **product owner**.

The business experts were involved in the operational business and the approach to the **development of a new application** was still unknown.

- simple
- intuitive
- consistent

Our Contribution at a Glance:

- Product Owner
- Requirement Engineering
- Conception and Elaboration of Userflow und User Storys
- Prototyping
- Frontend und Backend Development
- Test Management
